ENGINEERING COCKPIT

Brand Book v1.0

Approved visual system: aviation wings + sword, in the same premium family as Forge.

Core Guidelines

- Dark-only premium engineering interface.
- Polished steel, forged alloy, and controlled blue glow are required visual cues.
- The sword stays central; aviation wings replace the anvil of Forge.
- Must feel serious, precise, strong, agile, and trustworthy.
- Avoid cartoon, gaming, generic startup, or flat matte treatments.
- UI should resemble a dense but organized engineering cockpit / mission control.
